Projects

To-Do List App Deployment on AWS with Docker | *MERN Stack, AWS, Docker* **Mar 2026**

- Engineered a To-Do List web application and containerized it using Docker for consistent, scalable, and portable deployment across environments
- Provisioned and deployed the application on an AWS Ubuntu server, utilizing optimized configuration, environment setup, and container runtime processes
- Leveraged GitHub for version control and Git Bash for streamlined command-line operations, enabling smooth code integration and remote connectivity
- Configured Docker networking to expose the application on port 80, ensuring secure and reliable public access via the AWS instance
- Repository Link: https://github.com/RamBaranwal/aws-first-project

Hospital Management System | *MongoDB, REST APIs, Responsive Web Application* **Feb 2026**

- Developed a Hospital Management System with separate Doctor and Patient portals, enabling role-based access and streamlined appointment workflows
- Implemented secure authentication with credential-based login, managing user and appointment data efficiently using MongoDB
- Enabled patients to explore departments, select doctors, and schedule appointments based on real-time availability
- Established a dynamic workflow where doctors can approve, reject, or complete appointments with instant updates reflected in the patient portal
- Repository Link: https://github.com/RamBaranwal/hospital

Scalable Food Delivery Tracking System | *AWS Services, Linux* **Feb 2025**

- Architected a resilient multi-tier cloud infrastructure on AWS to ensure high availability and strong fault tolerance
- Set up core services including VPC, EC2, RDS, S3, Application Load Balancer, Auto Scaling, and IAM for a secure and scalable ecosystem
- Enhanced performance by offloading static assets to Amazon S3 and optimizing traffic distribution through load balancing
- Designed the system to handle 1,000+ concurrent requests while minimizing downtime and maintaining operational stability

Training

Application Development in Java | *Java, MySQL, Apache NetBeans* **Jul 2025**

- Built a Java Swing–based desktop application featuring an intuitive and user-friendly graphical interface
- Structured student registration and book inventory modules to improve data organization and processing efficiency
- Integrated MySQL for reliable data persistence with seamless database connectivity using JDBC
- Strengthened application reliability through effective exception handling and robust input validation techniques

Certificates

AWS Academy Graduate - Cloud Architecting- Training Badge **Jan 2026**
AWS Academy — Certificate

Oracle Certified Foundations Associate **Oct 2025**
Oracle — Certificate

AWS Academy Graduate - Cloud Foundations - Training Badge **Jun 2025**
AWS Academy — Certificate

Skills

Languages:	Java, JavaScript, Python
Technologies/Frameworks:	AWS, Docker, React JS, Node JS, Git, GitHub, Linux, Ubuntu
Database :	MySQL, MongoDB
Domain Skills:	Data Structures and Algorithms, Problem-Solving, Cloud Computing

Education

Lovely Professional University **2023 – Present**
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.77 *Phagwara, Punjab*

Decent School **2022 – 2023**
12th — Percentage: 72.60% *Rajasthan, Kota*

Sunbeam School **2019 – 2020**
10th — Percentage: 86.40% *Azamgarh, Uttar Pradesh*
